

## Transmission and Distribution Substation Battery Provider

### Why HOPPECKE?

- Design and manufacture batteries and battery systems
- Low maintenance required
- Very low warranty claim return rate
- Financially sound
- Design for the best efficiency and economics
- Aggressive manufacture pricing
- Competitive quality differences
- Aquagens – original inventor of design for less watering intervals

### Complete your battery system with:

- Battery racks
- FAT – Factory Acceptance Testing
- Signage per safety requirements
- Battery chargers

**NO ADDITIONAL COST for accessories:** bolts, inter-cell connectors, rack cables, number stickers, thermometer, hydrometer, water filling jug and terminal grease.

### We have 3 main options:

- grid | power V M (flooded lead-acid)
- grid | power V L (flooded lead-acid)
- grid | power FNC (nickel cadmium)

HOPPECKE is a **well-known and reliable battery manufacturer** producing high-quality, reliable and long-lasting batteries.

### 8 good reasons for FNC:

- 1** Service life up to 25 years
- 2** Easy maintenance in stationary applications
- 3** Wide operating temperature range
- 4** No sudden failure
- 5** Robust against external influences and long shelf-life
- 6** Environmental protection with complete recycling service
- 7** Lower operating costs and high cycle life
- 8** Minimum maintenance required and capable of high currents
