Valve regulated lead-acid batteries

Typical applications:

- Uninterruptible power supply (UPS)
- Telecommunications
 - Mobile phone stations
 - BTS-stations
 - Off-grid/on-grid solutions
- Power supply systems
- Emergency lighting

Your benefits:

- **Maintenance-free regarding water refilling** - due to innovative gel-technology
- **Good high current capability and deep discharge ability** - low investment costs due to innovative electrode structure
- **Optimum space utilization** - due to horizontal arrangement and stack
- **Higher short-circuit safety even during the installation** - based on HOPPECKE system connectors
- **Easy assembly and installation** - battery lid with integral handle *

* except for a few small capacity models

Design life: 15 years for above 50Ah, 12 years for below 50Ah (according to EUROBAT)

Optimal environmental compatibility - closed loop for recovery of materials in an accredited recycling system
