Model 27-32

Model 27-92

DESCRIPTION

Models 27 of the battery filling devices series are characterized by being professional mobile tools with a large capacity for customers with more than 5 batteries or trucks.

Model 27-32 is designed only for central water filling with a battery hose connector. Model 27-92 is designed also for central water filling with a battery hose connector, but additionally, there's an option for single-cell filling with a unique, 14 mm nozzle, filling pistol. Both models come with a 60-litre canister. The built-in battery has a capacity of 18Ah which gives a device operating time of up to eighteen hours, more than enough for regular maintenance of the batteries. Model 27 BFD series have got also an on-board charger that can charge and maintain the good condition of an 18Ah battery during operation break.

The pump can carry a minimum of four liters of water per minute with a maximum pressure of 1 bar. The low pressure means that it can operate on most industrial batteries.

Model 27-32 and 27-92 BFD series can be adjusted for special requirements and be equipped with a 25-litre smaller canister. Model 27-92 can be equipped with different pistol types on special request.

**DO NOT USE
THIS DEVICE FOR
BATTERY ACID
FILLING!**

FUNCTIONS
